

Model Number: RAM36R

Description: Rambo Table

Width: 36 ROUND In.

Construction: All of our table bases are made of either high-strength, structural steel – 30% stronger than the average steel – or heavy-duty cast iron. Columns on both are heavy-wall tubes made of 14 gauge steel. All connections are hard welded using state-of-the-art machinery and a deep-penetration welding process that maximizes strength.

Every table comes with your choice of laminate top. We use BIFMA-strength-approved, industrial-grade, low-formaldehyde particleboard for the cores in all our laminate table tops. Standard face for laminate top is .050" (countertop commercial grade) with a balancing phenolic resin backer for balanced construction.

Finish: All steel bases are available in 30 standard finishes or we can custom match any color. Bases are cleaned and primed before paint is applied via an automotive-grade powder-coat system that assures even and thorough coverage all over. The environmentally friendly epoxy/ polyester finish is baked in to create a beautiful, durable, color-rich surface. Cast iron bases are finished in either Ink Black or Black Wrinkle, but additional finishes are available.

Warranty: Protected by 10 year structural integrity warranty, one year against manufacturer's defects. Fabric protected for one year.
