#### General Cleaning Methods

**Castellani, Frou Frou and Mead:** Studies with ASCR show that nothing works better on Crypton® or Incase® than a powdered enzyme detergent, such as Tide® or Cheer® mixed with water. Be sure to rinse with a clean cloth and clear water. The fabric must be rinsed thoroughly, leaving no soap residue. Because Crypton® and Incase® fabrics were designed for easy maintenance, the use of solvent-based cleaners is unnecessary. In fact, some heavy-duty solvents can damage the textile's fibers. To be safe, we recommend that you do not use solvents in the general maintenance of Crypton® or Incase® fabrics.
