

Highlights:

- ✓ Established in 1993
- ✓ Serving 10,000 campers year round
- ✓ 3 Medically adaptive and accessible campuses
- ✓ Teaching life skills and how to overcome obstacles
- ✓ Therapeutic and adaptive programming
- ✓ 70% of camp costs subsidized by Camp Twin Lakes

Providing Energizing Camp Experiences for Children Facing Serious Health Conditions, Disabilities, and Life's Toughest Trials

In 1993, Camp Twin Lakes was brought to life through the vision of its founder, Doug Hertz. He recognized the need for specialized programming, particularly for those grappling with serious illnesses, disabilities, and other life challenges. This facilitated the incredible journey of helping all children to experience the joy of summer camp. Camp Twin Lakes transcends being a mere camp; it stands as a transformative force for these children and their families to feel the comfort of inclusion.

Camp Twin Lakes understands that children simply long to experience childhood. Through purposeful play, they aim to foster the development of their minds, bodies, and spirits - aspiring for them to depart camp as more confident and self-assured individuals, ready to overcome any challenges they may face.

Their mission is highly commendable! The amount of organization and managerial coordination needed to accommodate 10,000 campers each year is significant. Furniture Concepts is proud to have provided support by supplying resilient and sturdy furniture that is subjected to frequent and intense use.

When asked what makes Furniture Concepts a good fit for Camp Twin Lakes, CEO Dan Mathews said "We value their extensive furniture expertise. They truly grasp the demands of camps. We've been loyal customers for years, always turning to them for their consistency. We know we can rely on the durability and longevity of their products."

Camp Twin Lakes - We salute you! By nurturing pediatric mental health and crafting everlasting joyful memories for every child, you are truly making an incredible difference in the next generation.
